

Insepctor Gadget

This challenge wants us to check the files for the flag. We can recursively download all files to grep for interesting strings.

```
$ wget -r 178.62.14.240:32044
```

If we grep for the chars `_ { }` we can find the flag pieces within the file.

```
$ grep -RE "_|CHTB{|\w+}" *  
178.62.14.240:32044/index.html: <center><h1>CHTB{</h1></center>  
178.62.14.240:32044/index.html: <!--1nsp3ction_-->
```
